

SalesCopilot AI - API Documentation

Production-ready Sales Pitch Generator & Prospect Enrichment API (FastAPI + Celery + Redis)

Overview

The SalesCopilot API enriches prospect information using the Apollo Match URL and synthesizes a high-converting, personalized 60-second sales pitch using the Groq LLM. To ensure high availability and prevent rate limits from being exceeded, it uses an asynchronous Celery worker pipeline coupled with a Redis caching layer for instant responses on repeat requests.

Base Configuration

Parameter	Production Value	Description
Base URL	http://<your-server-ip>:1010	Local deployment port 1010
Rate Limit	5 req/min per IP	Redis-backed sliding window rate limiter
Cache Duration	24 Hours	Redis-cached responses are returned in <10ms

1. Generate Pitch Endpoint

HTTP Method: POST

Route: /api/generate-pitch

Request Headers

Header	Value	Required
Content-Type	application/json	Yes

Request Body (JSON Schema)

```
{
  "email": "arijit@c-zentrix.com",    // Required (String)
  "phone": null,                      // Optional (String)
  "apollo_api_key": null,             // Optional API Key override (String)
  "groq_api_key": null               // Optional API Key override (String)
}
```

Success Response (200 OK)

Returned when the prospect is successfully enriched and the pitch is generated. If a repeat request is made within 24 hours, the response is served instantly from the Redis cache (total_time: 0.00s).

```

HTTP Error Codes & Responses

429 Too Many Requests (Rate Limit Exceeded)

```
{  
  "detail": "Too many requests. Please wait before retrying."  
}
```

400 Bad Request (Missing Configuration)

```
{  
  "detail": "APOLLO_API_KEY is not set."  
}
```

500 Internal Server Error (Pipeline Failure)

```
{  
  "detail": "Failed to generate pitch: [detailed exception stack trace]"  
}
```
